

Fasttrack

Think big - start small - grow fast

Organisations are constantly facing the challenge of keeping ahead of their competitors, providing learning resources to their employees in fundamental business areas and meeting regulatory compliance requirements regardless of their industry sector.

e-learning and the implementation of a Learning Management System allow organisations to meet these challenges effectively and efficiently. For many organisations however e-learning is a new and unknown quantity surrounded by a lot of market hype and the ghost of the dot-com era. For these organisations knowing where and how to start is often the hardest part of finding a solution to their training needs.

e-learning solutions aren't just about creating courses – its about enabling organisations to embrace e-learning in a way that is best for them. But before making enterprise-wide decisions you need a way to start small, grow fast while continuing to think big.

Have you tried to run a pilot project and found that its too expensive, too time consuming and you still don't have any measurable results to make a decision on committing your organisation to a whole new approach to learning.

Let us introduce you to Fasttrack.

Fasttrack is not a long jargon filled engagement. It's has been designed to allow you to test everything you need to in a short period of time with just enough knowledge transfer so that you can appreciate the benefits, understand the features and measure user reactions to e-learning and learning management systems.

Being able to minimise the risk involved in running an e-Learning pilot is what Fasttrack is all about. We provide you with the IBM Learning Management System a selection of courseware from leading vendors and consulting workshops to help you understand both the environment and what it can mean for your organisation. If you select a hosted Fasttrack then with no technical overheads means you can have a pilot up and running in two weeks. Our fixed cost approach means that you know what you need from a funding perspective without the risk of creeping project expenses.

Time to Assess

We haven't chosen a 3-month time frame to allow you to assess the possibilities without rushing, and to get feedback from the selected learners within your organisation. Weekly calls with our project team and access to support means that you can explore, learn and evaluate as you go.

Fasttrack Inclusions

- Hosted e-Learning Infrastructure to support your user population with:
 - Corporate Branding for your organisation
 - Registration of users (from 10 – 100)
 - Automated registration & management of classroom training
 - Access to online Learning Styles Survey for learners
 - Access to online learner tutorial
 - Deployment of selected ready and tested set of e-Content
- Knowledge Transfer to the e-learning Project Team
 - Line of Business Solution and Content selection Workshop
 - Administration & Management of the LMS
- Support, Analysis & Review
 - Support for the e-learning Project Team
 - Scheduled Reporting
 - Data Collection & Analysis
 - Learner Feedback & Evaluations
 - Proof of Concept Validation Workshop

Flexible Options

We understand that not all organisations will want to complete a pilot using an hosted environment or to pilot 3rd Party content.

Because of this we have included two options to extend the flexibility of Fasttrack allowing you to tailor the pilot program to your needs.

- Option of one custom New Hire or Compliance course development
- Internal deployment instead of hosted offering

Benefits

In summary Fasttrack can provide you with the following benefits

- Reduce Financial risks - Fasttrack has been designed to reduce large up front investments in technology, time and resources reducing the financial risk in your pilot project
- Flexible options- allowing you to tailor Fasttrack while still retaining control over the project.
- Controlled time frames - Fasttrack allows you to get up and running in a short but controlled time frame.
- Structured methodology - allowing you to run the pilot within a structured framework supported by knowledge transfer and workshops
- Solid evaluation data - allowing you to build your business case to progress your e-learning initiative to the next stage.

Contact us if you would like to discuss your requirements further or to arrange a meeting and demonstration.
